

CS-562 Project5 Assignment Report

jinhyun.choi / Jinhyun Choi

For this assignment, I mainly implemented Non-Photorealistic Rendering and hand-drawing style vertex noise.

This is the instruction for each feature's implemented code files or line numbers.

1. Non-Photorealistic Rendering:
 - In shaders file - lightStage - 297 ~ 335 line.

2. Hand-drawing style vertex noise:
 - In shaders file - gBuffer.vert - 19~35 line.

+) It takes a little bit taking time to start the project. Because I used a high polygon obj file of the Bunny model.

+) I set only the x64 version.

Implementations:

- Non-Photorealistic Rendering
- Hand-drawing style vertex noise

Non-Photorealistic Rendering:

1. *Threshold Value: 0.3*

2. *Threshold Value: 0.5*

3. *Threshold Value: 0.7*

4. *Threshold Value: 0.9*

Hand-drawing style vertex noise (base Threshold 0.9):

1. Noise Intensity:0.0:

2. Noise Intensity:0.0025:

3. *Noise Intensity:0.0045:*

4. *Noise Intensity:0.007:*

Fun Result (IBL + AO + Non-Photorealistic Rendering + vertex noise)
